Mrs. H. I. SCHUNCK.

West Fayette St., Celina, O.

My wife was taken sick about six weeks ago. Our physicians said her lungs were affected, and advised us to take her to Colorado.

She grew worse very rapidly. On August 17th two noted specialists examined her carefully. They pronounced her case quick consumption and told me positively that she could not live longer than ten days. Dr. ... said her body was just a mass of tubercles; that there was not a single square inch that did not have thousands of them. She had temperature of 104, no appetite, night sweats, chills and was delirious. August 18th she started taking Nature's Creation and responded, as if by magic. Her appetite is extra good, sleeps sound, no more chills or night sweats, temperature and pulse normal. She is gaining strength very rapidly, and will no doubt soon be her old self. Very truly,

E. L. Hughes
